  WillCast7

Programmer with over 4 years of experience in software development, both in corporate environments and freelance projects. I have worked in teams to lead projects, where I have been able to develop skills in problem-solving, time management, and adaptability in changing environments.

My proactive approach and willingness to take the initiative have helped me tackle challenging situations. Likewise, my ability to collaborate effectively has contributed to the success of the teams I've worked with. In addition to my experience in companies, freelancing has strengthened both my technical skills and my soft skills, including communication and empathy.

I am a passionate self-learner, always eager to learn and evolve. My ability to gather requirements and work under agile methodologies, especially SCRUM, has been crucial in the timely delivery of projects. My experience spans various technologies, including PHP (Laravel), JavaScript (Angular, React, Vue, Strapi, React Native, Node), SQL (PostgreSQL, MySQL, SQL Server), C# (.NET), Ruby (Ruby on Rails), Java SE, and SpringBoot.

I enjoy staying at the forefront of technology, studying different architectures and design patterns. Being passionate about critical thinking, I am confident that my experience and skills will significantly contribute to any project I undertake. I am excited about the opportunity to continue growing and contributing to dynamic and ambitious teams.

Third Place at Comfeco 2021
